

iCAN AFTER SCHOOL STEAM ENRICHMENTS

AT ST. GREGORY CATHOLIC SCHOOL

Our STEAM programs ignite curiosity through engaging, hands-on activities. Students meet weekly and **explore rotating curricula filled with exciting new projects every quarter**—many of which they get to take home. Select classes conclude with a special showcase where families are invited to celebrate students' work

CLASS DESCRIPTIONS

Little Genius (Science Jr.) (PK4–K): A playful introduction to science designed for curious little ones! Children explore hands-on experiments tailored to their developmental level, nurturing early interest in how the world works.

LEGO® Robotics (1st–5th): Young engineers dive into LEGO® SPIKE™ Essential challenges to explore real STEAM concepts through building, coding, and storytelling. Kids work together to solve problems, program creations, and bring their ideas to life in this fun, future-ready robotics class.

Fashion Design (1st-5th): Perfect for budding designers! Students learn hand-sewing, sketching, and garment creation as they craft outfits for every season. The grand finale is a confidence-boosting runway show—and their custom outfit goes home with them! A creative blend of fine motor development, design skills, and self-expression.

Aviation (K–5th): Watch your child’s curiosity take flight! In this hands-on STEM adventure, students learn real aviation and flight science while building and flying their own high-soaring models. Along the way, they’ll strengthen woodworking, math, science, and engineering skills—all through exciting, sky-high fun.

Great Artists (K–5th): In this inspiring art journey, students explore drawing, painting, sculpting, and more—each project inspired by famous artists throughout history. Children build their own art portfolios and proudly present their masterpieces in a gallery showcase during the final class.
